Can I use this as IdP for small business?

Can I embed Groups?

Can I use Groups from my federated IdP?

Potentially.
Consider additional service needs and their support for "Sign in with Apple".

No. Only one level of Users is available for both Group Types.

Currently not!

Can I auto install apps & make them available in the Apple Business App?

Can I set PPPCs along with App Store Apps?

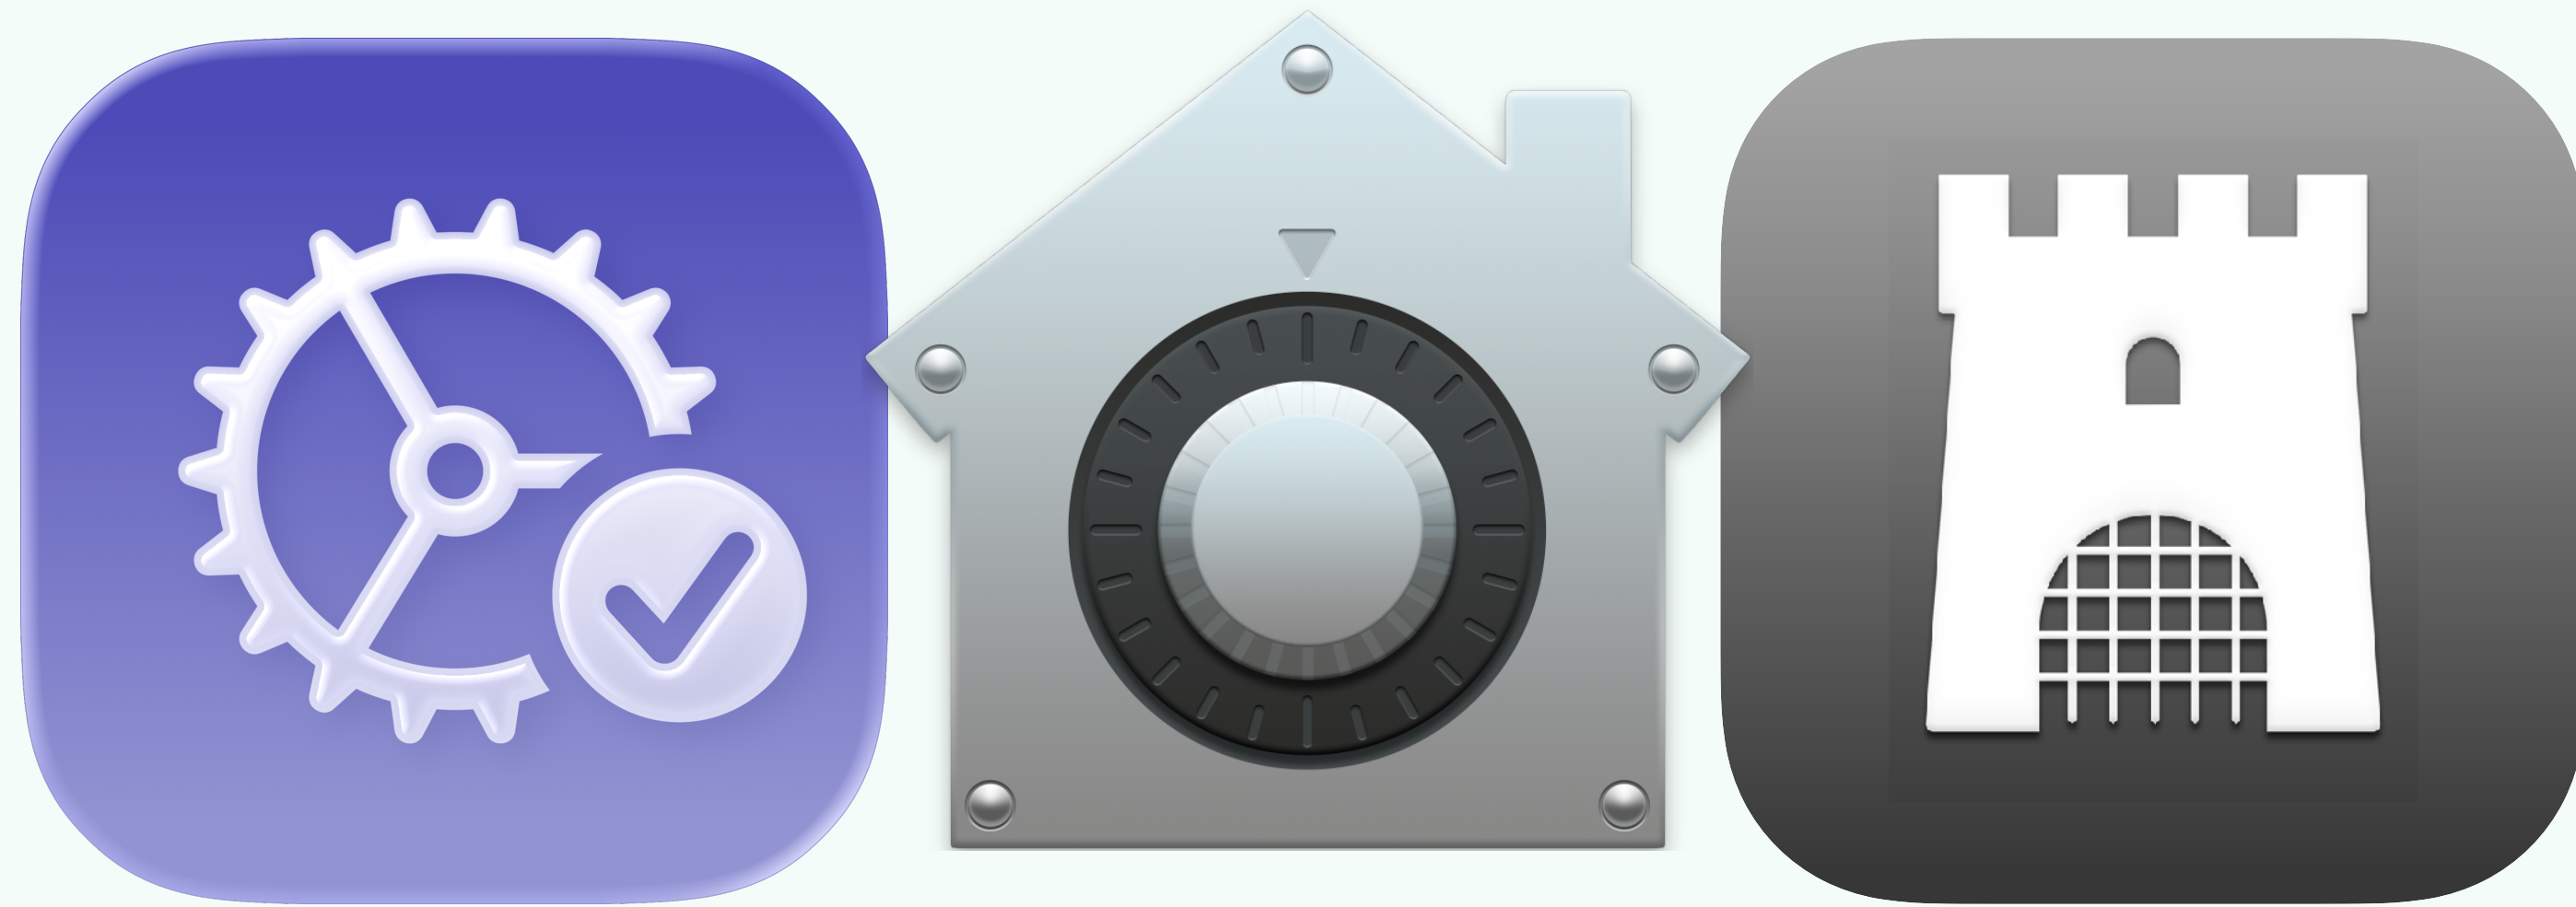

Can I run scripts in Packages?

No! Each App must be set to either manual or auto.

Only for Packages. Use Custom Settings.

Yes!
(untested, but mentioned on Apple Session)

Can you rotate the FileVault Keys?

Currently not in the user interface.

Can I set additional restrictions?

Additional restrictions are possible with custom settings
`com.apple.applicationaccess`

What about pSSO

Right now it works only with Company Portal and custom setting.

Time Machine

Time Machine

Time Machine backs up your computer and keeps local snapshots and hourly backups for the past 24 hours, daily backups for the past month and weekly backups for all previous months. The oldest backups and any local snapshots are deleted as space is needed.

These settings have been configured by a profile.
